

CONDUCTIVITY PROBE

CTK-5-SS-PP

Code: 9900101102

Main Features

- Cell Constant: 0,2 cm⁻¹ or K=5
- Body material in PP
- Stainless Steel 316L Electrodes
- PT100 temperature sensor included
- Mechanical Connection: ¾ GAS Male PP

Field Application

- Wastewater
- Drinking Water
- Cooling Towers
- Irrigation
- Reverse Osmosis

TECHNICAL CHARACTERISTICS

Measurement range	0,1 ÷ 2.000 µS
Constant [C-K]	C=0,2 cm ⁻¹ ; K=5 cm
Temp. Range	80° C
Pressure Range	6 bar (*)
Body material	PP
Electrode material	AISI 316
Mounting Process	3/4" GAS Male
Cable	Not included (**)
Storage temperature	10 ÷ +50 °C

DIMENSIONS

(*) The maximum pressure of 6 bar is guaranteed at 25 °C. As the temperature increases, the pressure decreases linearly and at 50° or 80 °C, the maximum pressure is 1 bar.

(**) cable and electrical connector not included, to be used in conjunction with CC series cables.
